

Glenwood Country Day School's Summer Adventures Camp

Sunscreen Authorization Form

Appropriate sunscreen use is important to prevent skin damage and skin cancer in children. The Maryland Department of Health and Mental Hygiene encourages the appropriate use of sunscreen during summer activities. At the same time, sunscreen can cause allergic reactions in some children and parents need to be involved in the decisions about sunscreen use.

The DHMH requires that the parents send their children to camp with their first application of sunscreen in the morning. Camp staff will reapply several times throughout the day. Please fill out the following Sunscreen Authorization:

GCDS Summer Adventures Camp staff have permission to apply sunscreen to my child, _____.

Brand of sunscreen provided by family is _____.

Parent Signature _____ date _____
